

Habibo !!! 😊
Habibo !!!

Yolo

- Go through the lecture
- Stackoverflow [Doubt] :- Google
- Ask your batchmates
- TA support
- Ask instructor

String input

Scanner scn = new Scanner(System.in);

```
// int    => scn.nextInt()  
// double => scn.nextDouble()  
// string => scn.next()
```

```
String str = scn.next()  
// Reads one word from input
```

Input => Arnav
=> Arnav Jindal

```
String str = scn.nextLine()  
// Reads entire sentence from input  
=> Arnav Jindal rocks !!
```

⇒ Arnav Jindal is 25 (1)
 Arnav is a teacher (2)

Integer Overflow

System.out.print `int x = 1010; // in 1019`
 `SOP(x); // Random value`

Typecasting

`int x = 10;`
`Long y = (long)x;`

`long x = 10;`

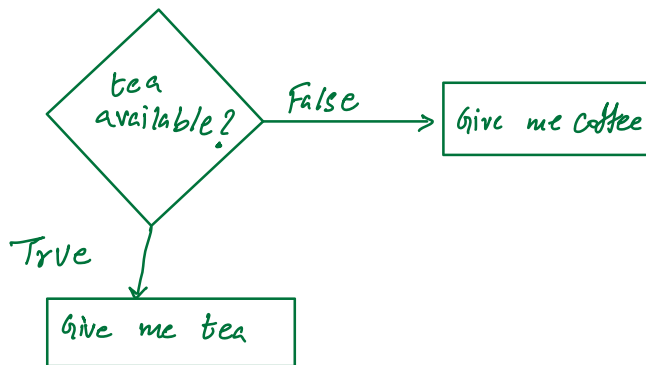

int y = (int) x;

If - Else

I'll drink tea if it is available

condition

If tea is available give me tea else
give me coffee

Syntax

```
if ( condition ) {  
    // Do your work here  
}
```

```

if ( condition ) {
    // Do your work here
}
else {
    // Do else work here
}

```

Conditions \Rightarrow True / False
 \downarrow Boolean
 Boolean expressions

1. True
2. $4 \neq 5$
3. $4 + 5 \neq$

Assignment
 int $x = 5$;

is $x = 5$?

$x = 5$
 $\swarrow \quad \searrow$
 Yes No

$x \neq 5$
 $\swarrow \quad \searrow$
 Yes No

Check if person is eligible to vote

Age = 18

```
if ( age >= 18 ) {  
    SOP(" Can vote");  
}  
else {  
    SOP(" Can't vote");  
}
```
